

# JoinMyVideo

VIDEOCONFERENCING ON ANY DEVICE, AT ANY TIME

Modern business today is distributed by worker's geographic location and in their choice of devices. But even though work isn't done in the same place, the pace of business is instant, with an "always-on" culture. So, when business needs to get done with anyone, from anywhere, on any device, at any time, you need JoinMyVideo from Glowpoint.

Glowpoint's JoinMyVideo leverages Virtual Meeting Room (VMR) technology to provide companies a globally accessible, reservation-less video meeting solution with content sharing that can connect devices from video room systems to mobile tablets. JoinMyVideo provides presence, IM, and direct calling as well as document sharing, and can integrate with most existing UC infrastructures.

## BENEFITS

Convenient always-on virtual meeting rooms for conferences at a moment's notice.

User-friendly technology allowing attendees to connect with their own device, including desk-tops, tablets, smart phones, laptops, or room-based systems.

Accessible video conferences to anybody, inside or outside the company.

Simple, straightforward pricing with no commitments, no year two increases, no hidden charges.

## FEATURES

**ACCESSIBILITY** Access video conferences using Universal Resource Identifiers (URI), Hyperlinks to the video client / Chrome's WebRTC or even Audio Dial-in for compatibility with videoconferencing systems, Chrome browser, desktop and mobile apps.

**VCAAS** Videoconferencing from the cloud with no core video bridging infrastructure to buy.

**VIDEO ENDPOINT AGNOSTIC** Use whatever video endpoints or UC infrastructure you already have.

**ENTERPRISE ADMINISTRATION** Web-based access to user accounts, provisioning, support, and reporting.

**TREMENDOUS SCALE** Connect up to 24 people per video meeting. No limit on video meetings or usage.

**QUALITY VIDEO** See your meeting participants and review documents in high definition.

**EASILY MANAGED** Send an invite, connect people on the fly, change layouts, or send chat messages all through your browser.

**UC FEATURES BUILT-IN** See if your colleagues are online, send them an IM, or call them on voice or video.

**SKYPE FEDERATION** Integration with Skype for Business and Office 365 with dual homed technology and bi-directional content sharing.

**CONTENT SHARING** Collaborate with ease when you can share slide decks, diagrams, or other materials as a part of your videoconferencing.

**SUPPORT** Access to 24x7 phone and email support comes standard.

**INTEROPERABILITY** – We support SIP, H.323, WebRTC and audio-only endpoints, as well as various manufacturers including Polycom, Cisco, Lifesize, Microsoft Surface Hub, and Avaya/Radvision.
